

Service Scheduler - User guide

- [Client installation](#)
- [Mobile client installation](#)
- [Application server settings](#)
- [Loan car diary](#)
 - [Creating, editing and deleting entries](#)
 - [Loan car form](#)
 - [Loan car diary administration](#)
- [Workshop planner](#)
 - [Adding staff / contractors](#)

Client installation

The client is available on the from the running server instance of service scheduler. (eg <http://servsched:8090>) The default Server Port: 8090 however this could be changed during installation.

 or type unknown

Client - User Setup	This will install the application in the user current profile. Admin rights are not require
Client - User Setup (System Wide)	This will install a stub in the program files folder and a desktop icon for all users. This will then install the application in users profile. This is helpful for workstations used by multiple users
Client - System Setup	This will install in Program files for all users. Requires admin rights.

Mobile client installation

Service Scheduler mobile requires that Web Services are installed and accessible from customer WAN

- [Android] (<https://play.google.com/store/apps/details?id=au.com.abitsoftware.servsched>)
- [iOS] (<https://itunes.apple.com/us/app/service-scheduler/id898640065?ls=1&mt=8>)

Application server settings

The default setting for the application server in Service Scheduler is [AUTODISCOVER] this will attempt to find the server user DNS SRV records.

If DNS is not configured or testing connectivity issues, the hostname can be adjusted.

Connection Name	Hostname	Port	EndPoint
<input checked="" type="checkbox"/> Default	[AUTODISCOVER]	8090	/RPC2

Application Server Settings

Connection name: Enabled ☒

Hostname: Port:

End point:

NOTE: DNS is the recommended method with the next preference being a hostname (eg servsched) this makes future upgrades or migrations to new servers easier.
