

# Client installation

The client is available on the from the running server instance of service scheduler. (eg <http://servsched:8090>) The default Server Port: 8090 however this could be changed during installation.

 or type unknown

Client - User Setup	This will install the application in the user current profile. Admin rights are not require
Client - User Setup (System Wide)	This will install a stub in the program files folder and a desktop icon for all users. This will then install the application in users profile. This is helpful for workstations used by multiple users
Client - System Setup	This will install in Program files for all users. Requires admin rights.
