VPN Portal

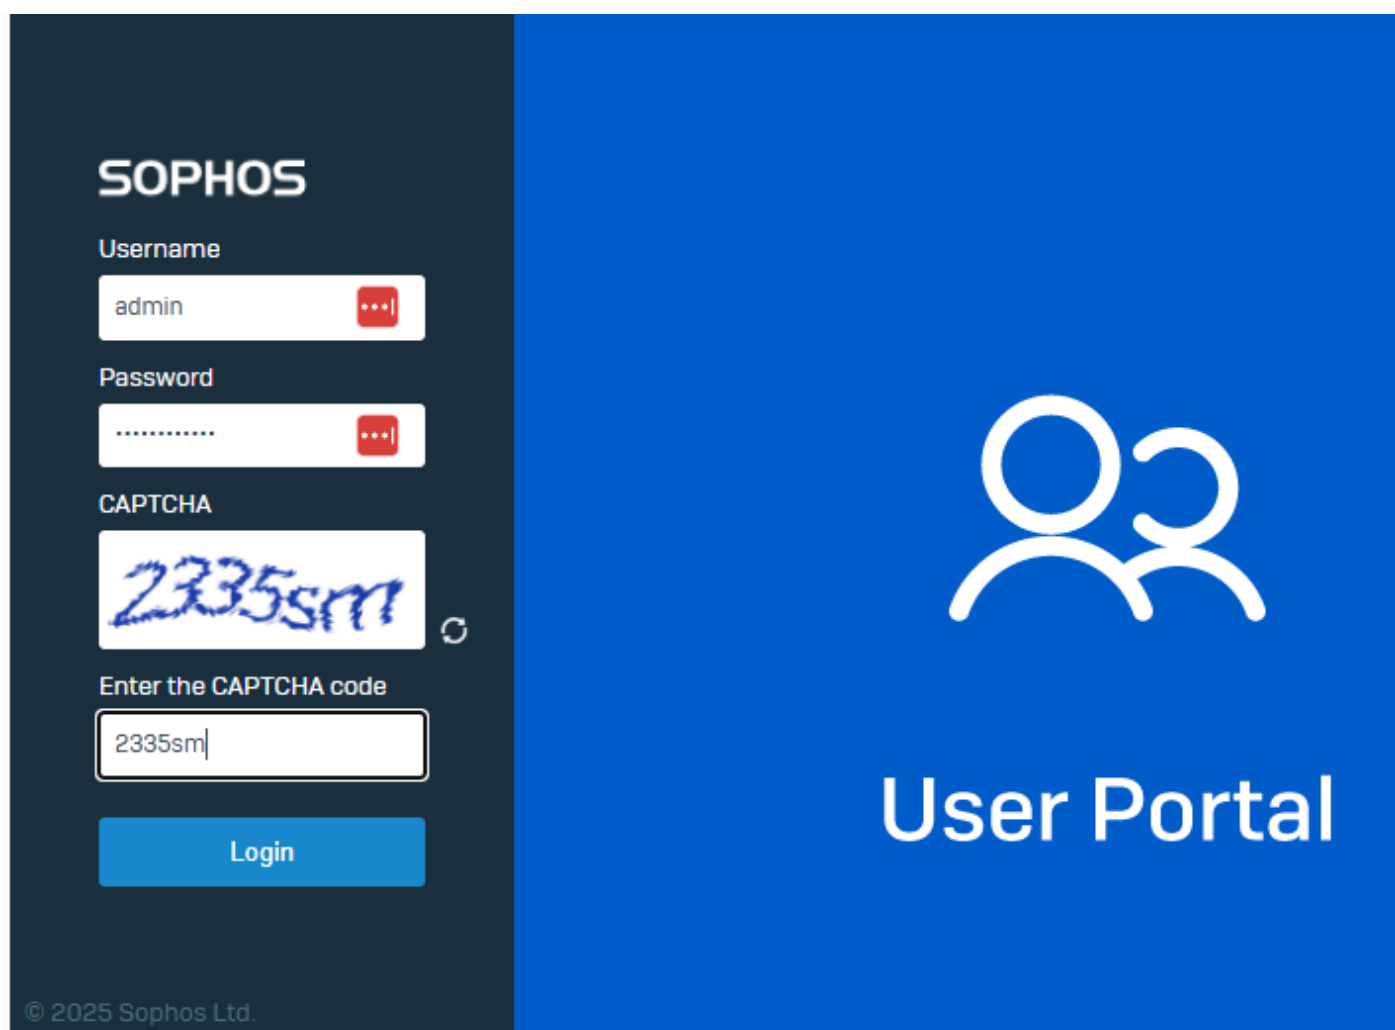

Note: if you have 2FA setup you will need to enter after password 6 dig from Sophos intercept X App 2FA Code) Password+2FA_Code no spaces eg: ClearSky654731

Note: if you can't login with email your account might not exist: You can verify if credentials are working

Login to User Portal to activate email sync with Firewall (eg <https://{ipaddress}:4443>)

User Portal:

<https://60.231.59.102:4443/>

The image shows the Sophos User Portal login interface. On the left, there is a dark blue sidebar with the 'SOPHOS' logo at the top. Below the logo are input fields for 'Username' (containing 'admin'), 'Password' (masked with dots), and a 'CAPTCHA' section. The CAPTCHA image shows the text '2335sm'. Below the CAPTCHA is a text input field containing '2335sm' and a 'Login' button. On the right, there is a large blue area with a white icon of two people and the text 'User Portal'.

User Portal

The image shows the Sophos User Portal 'Policy information' page. On the left is a sidebar with the 'SOPHOS' logo and a menu with options: Home, Personal, Download client, Internet usage, Email, and Logout (highlighted with a red box). The main content area is titled 'Policy information' and contains a table with user details. A red callout box points to the 'Username' field in the table, containing the text: 'Once you login it will say on top username@company.com.au'. The top right of the page has a link 'User portal for abit'.
