

# VPN Guide

Visit user portal login with your SSL details. (eg <https://{ipaddress}:8443>)

<https://49.255.82.234:8443>

user: {generally PC user name} joe.bloggs

password: {generally PC password}

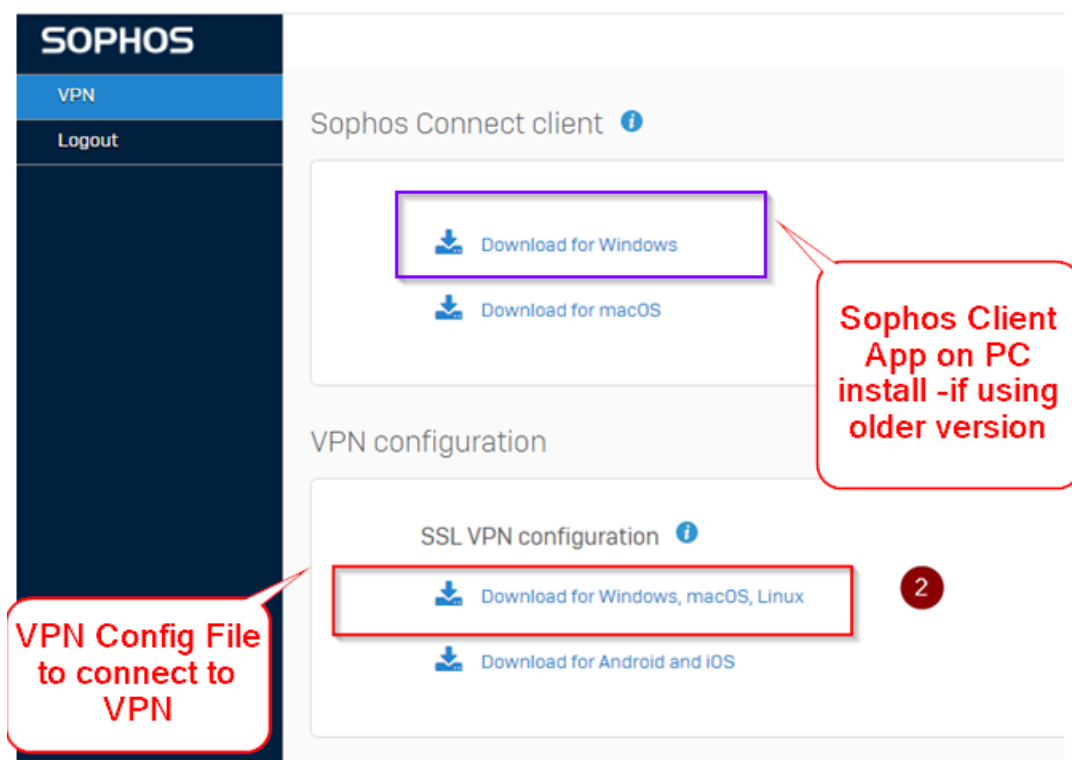

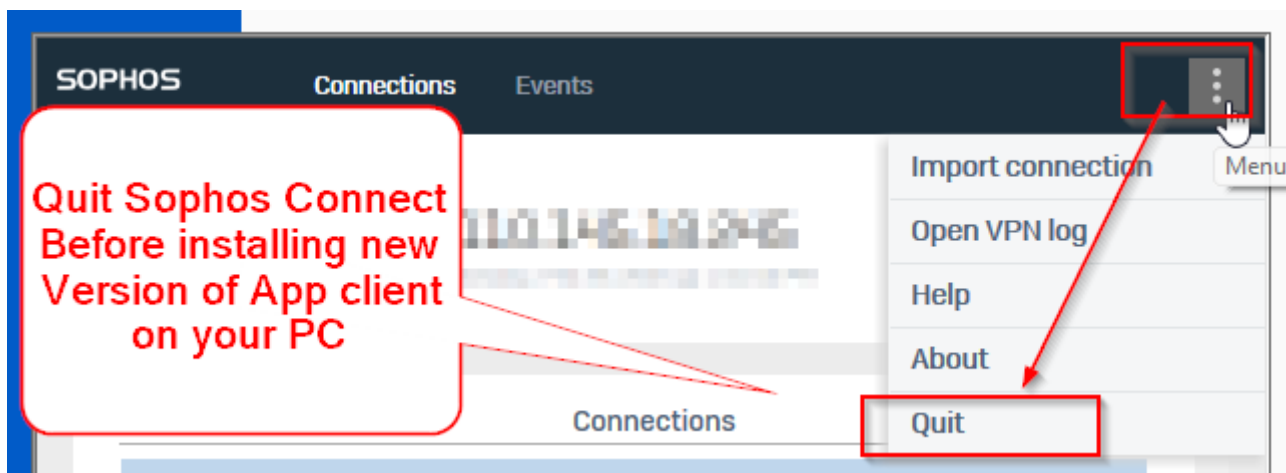

Note: if you have 2FA setup you will need to enter after password 6 dig from Sophos intercept X App 2FA Code) Password+2FA\_Code no spaces eg: ClearSky654731

Once Logged it download the config file

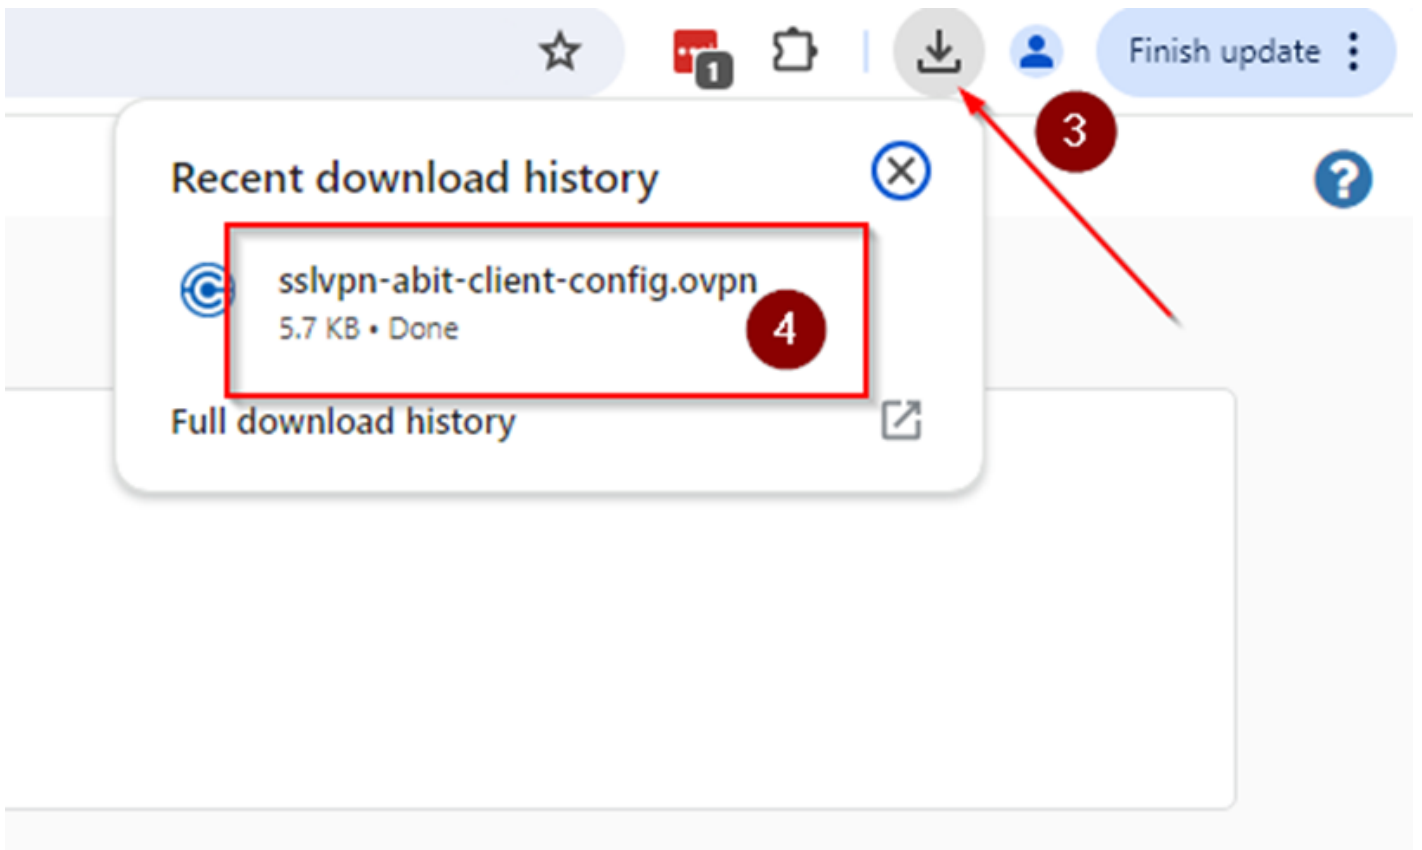

**Please Note: If 2FA is enabled you will need scan QR code via Sophos Intercept Application**

**Note: If your Sophos Connect Client APP on PC is too Old -Can update app**

**Click on Sophos Connect Client for Windows --> Note before install click on Running APP**

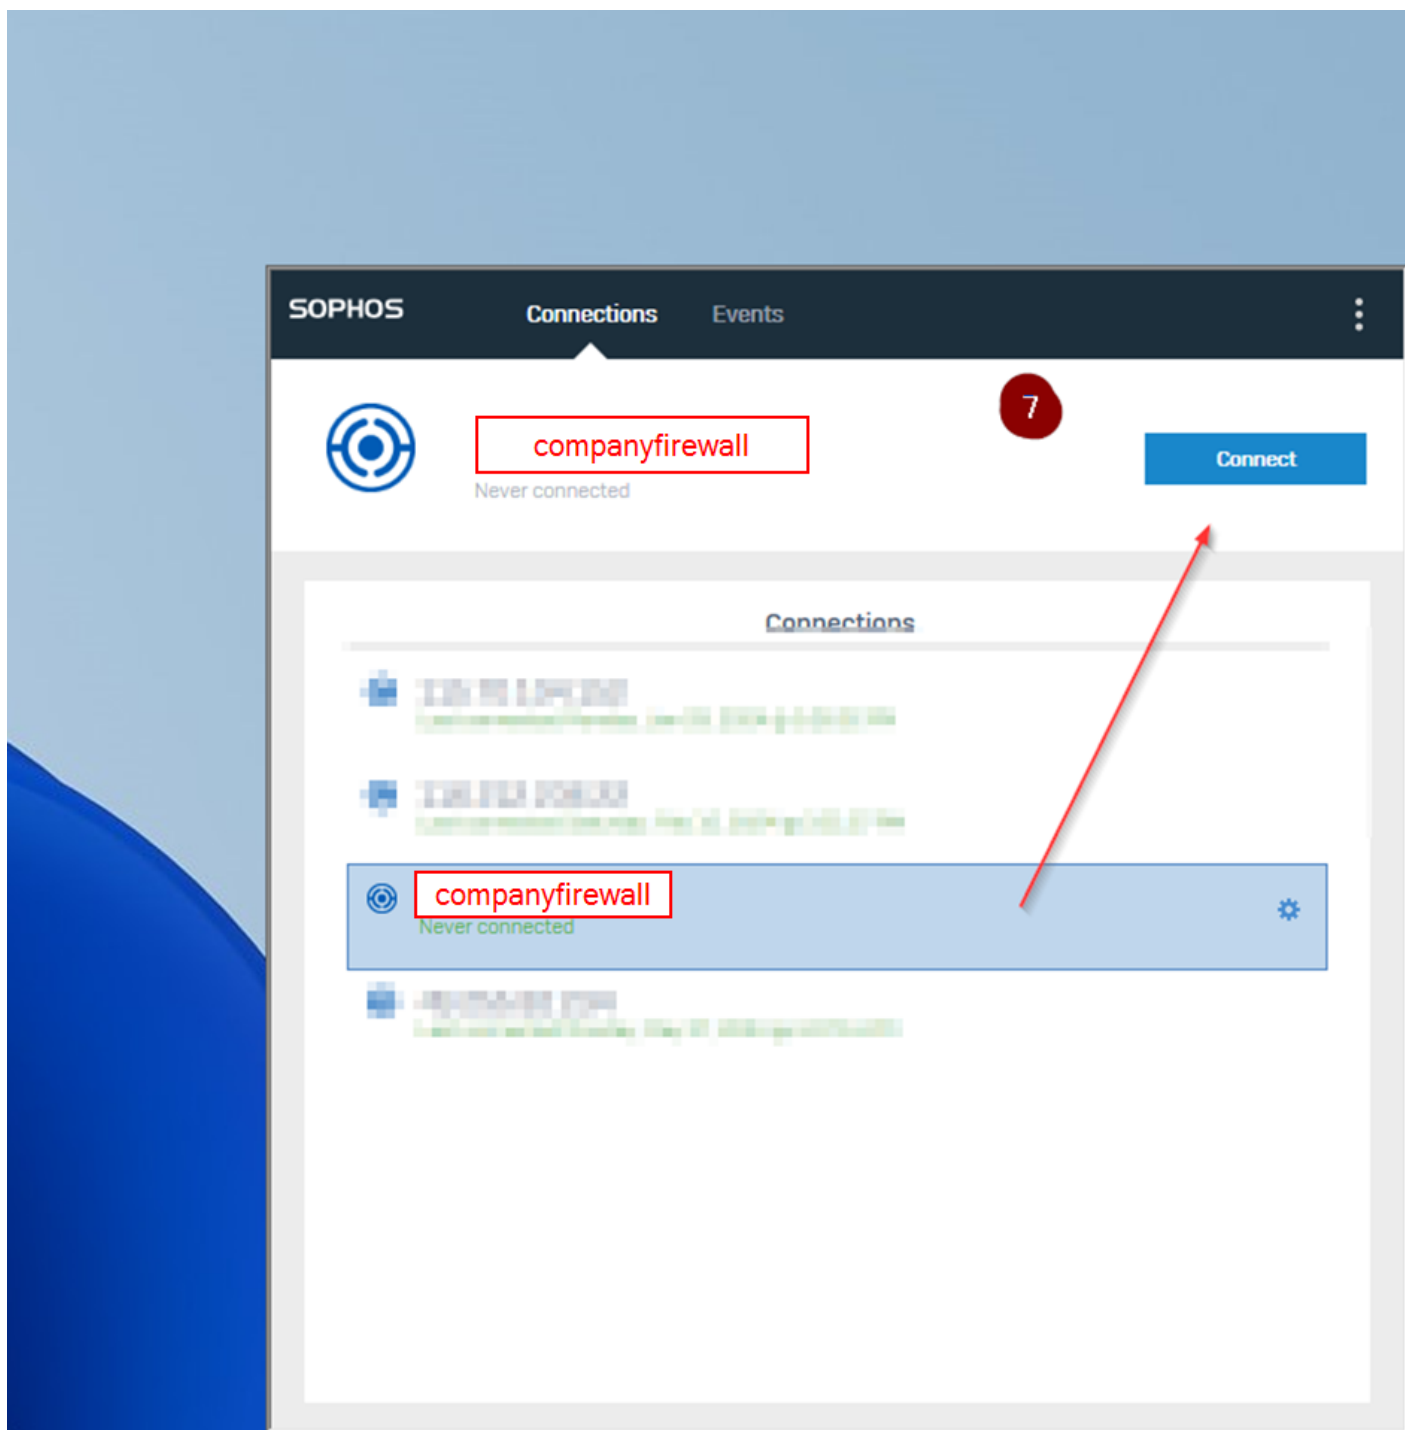

Go to browser downloads upper corner folder double and double click config file or got to download folder windows and double click the Config file

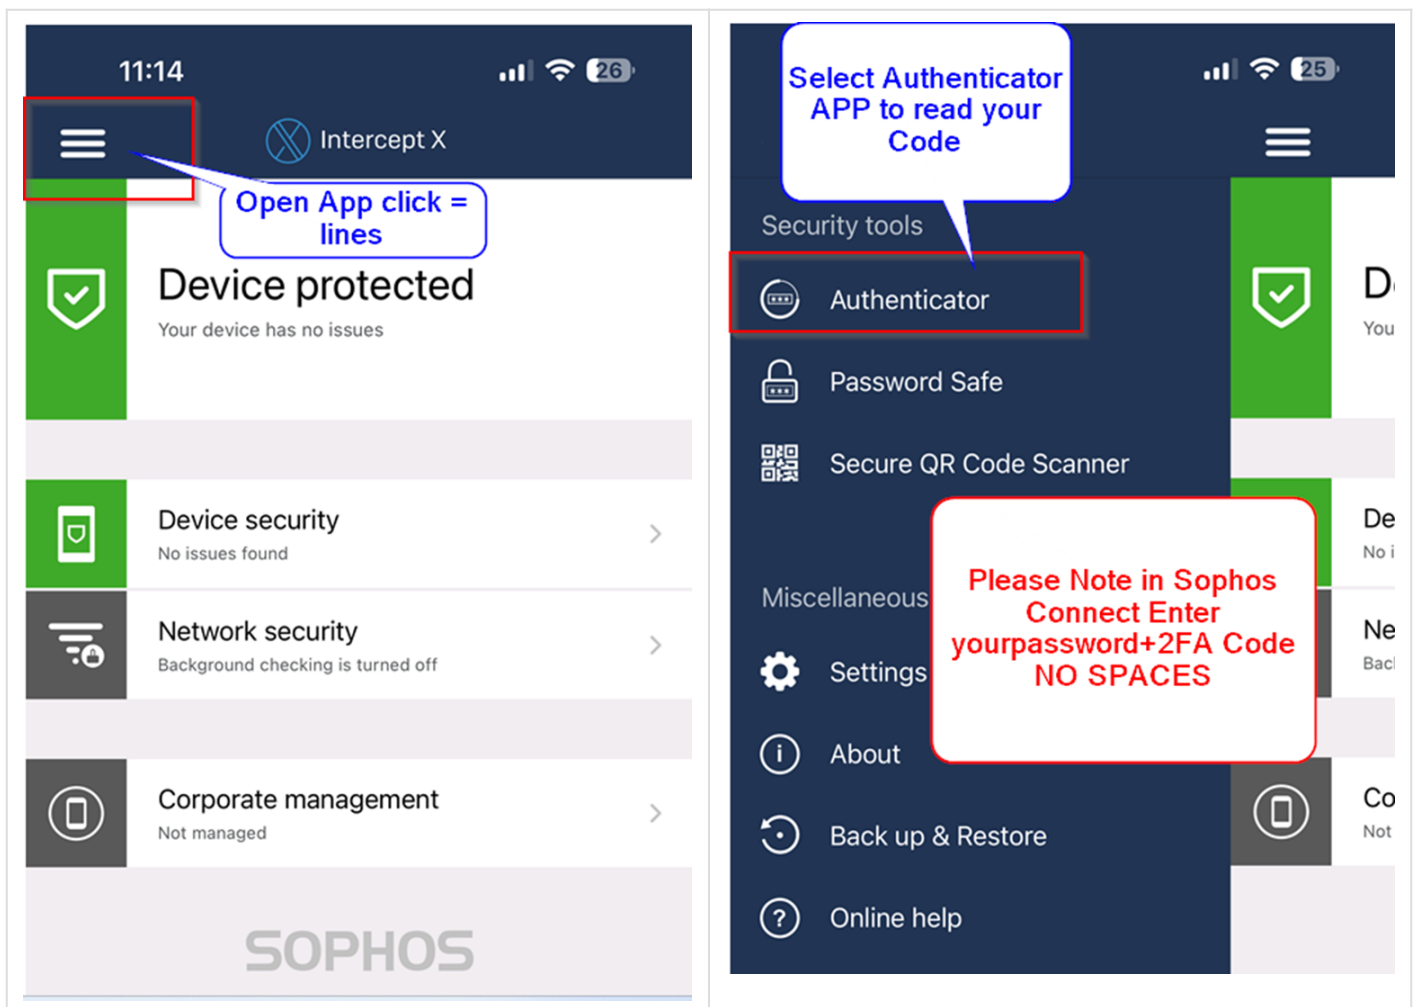

Open sophos connect

Click Connect to SSL VPN for the required connection

if you have 2FA enabled via Sophos Intercept X - Load your 2FA code Open Intercept X on the Phone

Sophos Connect should show ( Green tick )

companyfirewall

8

Disconnect

Connected today Monday, May 27, 2024 @ 4:11:58 PM
