

User interface

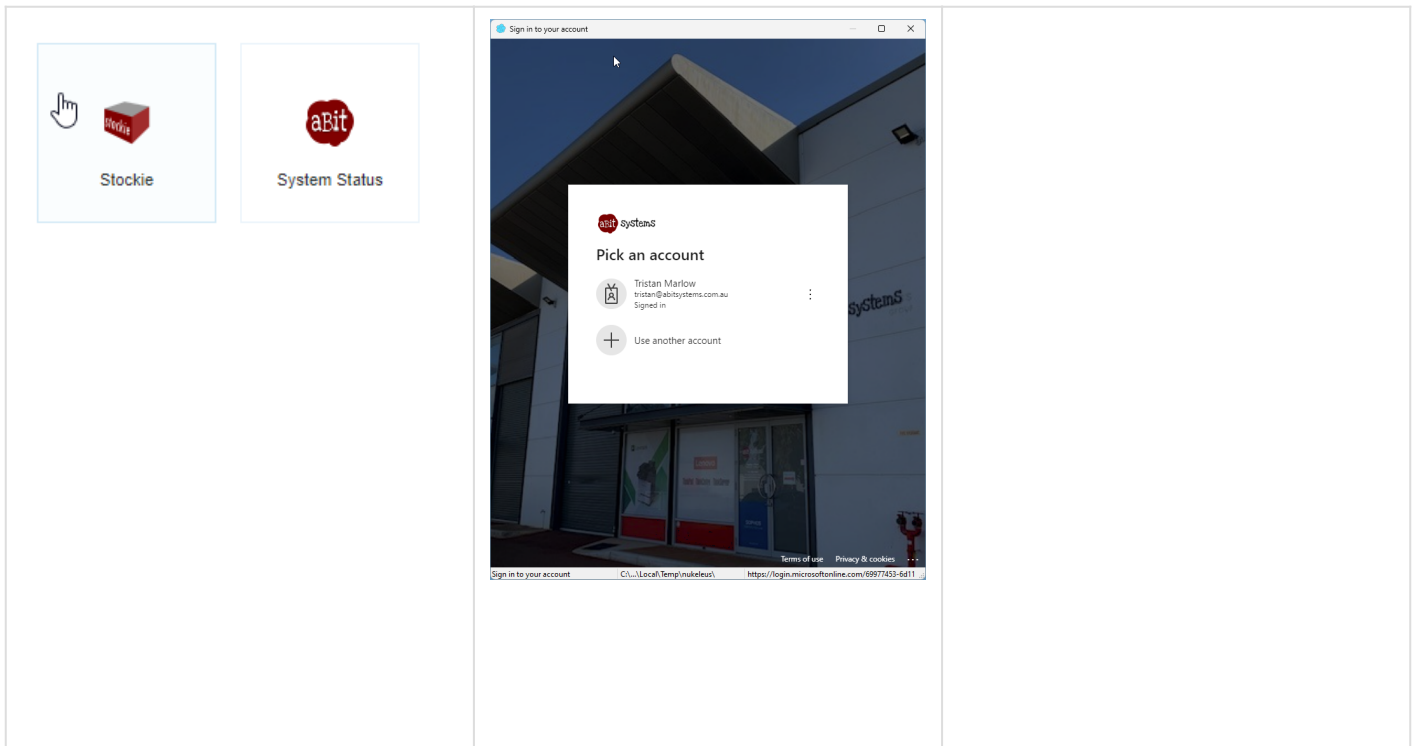

Overview

This is a general overview of the user interface for Stockie

Login

Login options may vary depending on the environment configured for your installation

Web hosted login	Microsoft SSO	Local or LDAP
<div><p>Enter credentials to sign in</p><div><input type="text" value="ABIT_tristan"/></div><div><input type="password" value="....."/></div><div><div>→</div> Sign in</div></div>	<div></div>	<div></div>
After login, select "Stockie"	Login to Microsoft Entra	Login complete

Home page and navigation

Change modules is available under the navigation menu. The home page offers quick search options

History

During use of the application, the history menu will recall the prior records you have view. Use this to quickly return to an entry.

Data grids

When data is displayed in a grid it will generally have the following features available.

When columns are moved, resized or hidden this applies only to the current user each user can have a unique display.

A screenshot of a data grid application with several annotations in green boxes. The grid displays a list of vendors with columns for 'Vendor Name' and 'Vendor Code'. Annotations include: 'Show or hide columns by selected drop down arrow' pointing to a dropdown arrow in the 'Vendor Name' header; 'Customise grid columns' dialog box showing a list of fields with checkboxes; 'Resize columns' pointing to a vertical line between columns; and 'Drag a column to move it's position and change column order' pointing to a column header. The grid lists vendors like Abbott Australia, Atrium, Bay Medical, Bio-Excel(Australia), BioTronik, Boston Scientific, Braun, Covidien, Device Technology, Diverse Devices, Imaxeon, Johnson Johnson, Lifehealthcare, Mallinckrodt, Mayo, Medical Vision Australia, Medtel Australia, Pyramed, and St Jude Medical.

Grid footer options

A screenshot of a data grid footer with several annotations in green boxes. The footer contains information such as 'Last update: 17/01/2025 8:12:14 AM', '1:827', and 'Duration: 0.015 sec.'. Annotations include: 'Last date and time grid data was refreshed.' pointing to the last update timestamp; 'Current record position and total records in grid' pointing to the record count; 'How long it took to gather data' pointing to the duration; 'Quick search of data in the grid' pointing to a search input field; and 'First, prior, next or Last quick navigation' pointing to navigation buttons. The grid header shows columns for 'Whisper Extra', 'HT Progress 20', 'Balance MW E', 'Hi torque Flex', and 'Hi-Torque Vers'.

Search panels

When a search panel is available it will allow quick search of information. The panel may also automatically search when fields are modified.

The screenshot shows the 'Item Search' panel with various search filters and controls. Annotations highlight key features:

- Enter search information:** Points to the 'Description' and 'Part number' input fields.
- Limits the results returned on a search. If you are hitting the limit add other criterias.** Points to the 'Record limit' dropdown set to 1000.
- The search will happen automatically after changing search settings.** Points to the 'Auto search' checkbox.
- Create or edit entries returned:** Points to the '+ New' button.

Other visible elements include 'Quick Filter' (Active items), 'Vendor' (No selection), 'Type' (No selection), 'Location' (No selection), 'Item ID', 'Size', 'Tender number', 'View', 'Delete', 'Refresh', 'Search', and 'Reset' buttons.

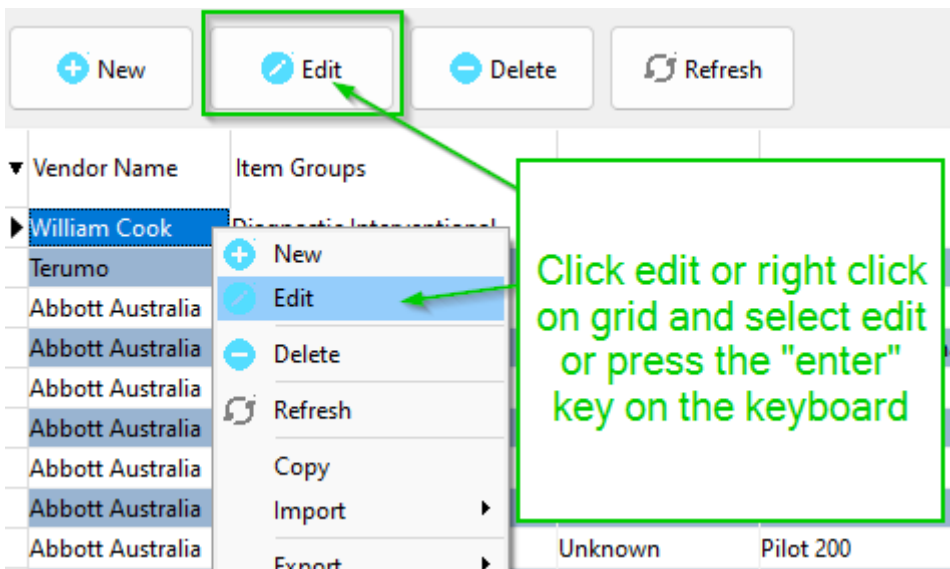

Creating new entries

This screenshot illustrates two methods for creating new entries:

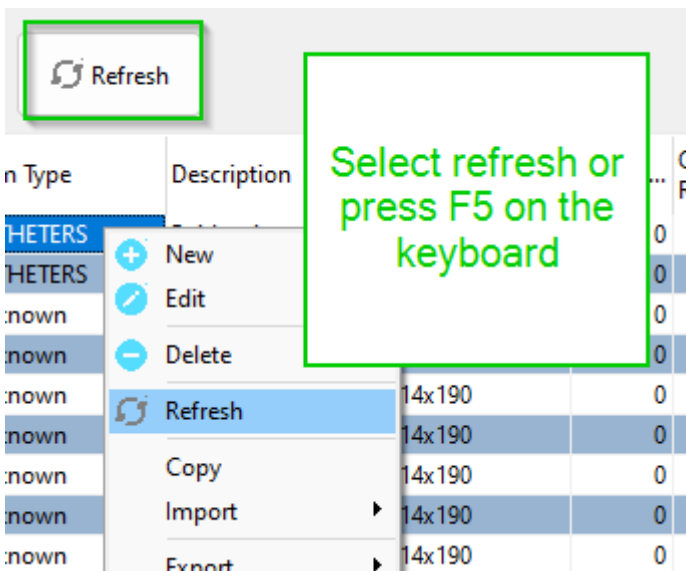

- Click new:** A green box highlights the '+ New' button in the top left corner of the interface.
- Right click on grid:** A green box highlights a right-click context menu on a grid row. The menu includes options: 'New', 'View', 'Delete', 'Refresh', 'Copy', 'Import', and 'Export'.

An annotation box states: "Click new or right click on grid and select new or press the 'insert' key on the keyboard."

Editing existing entries

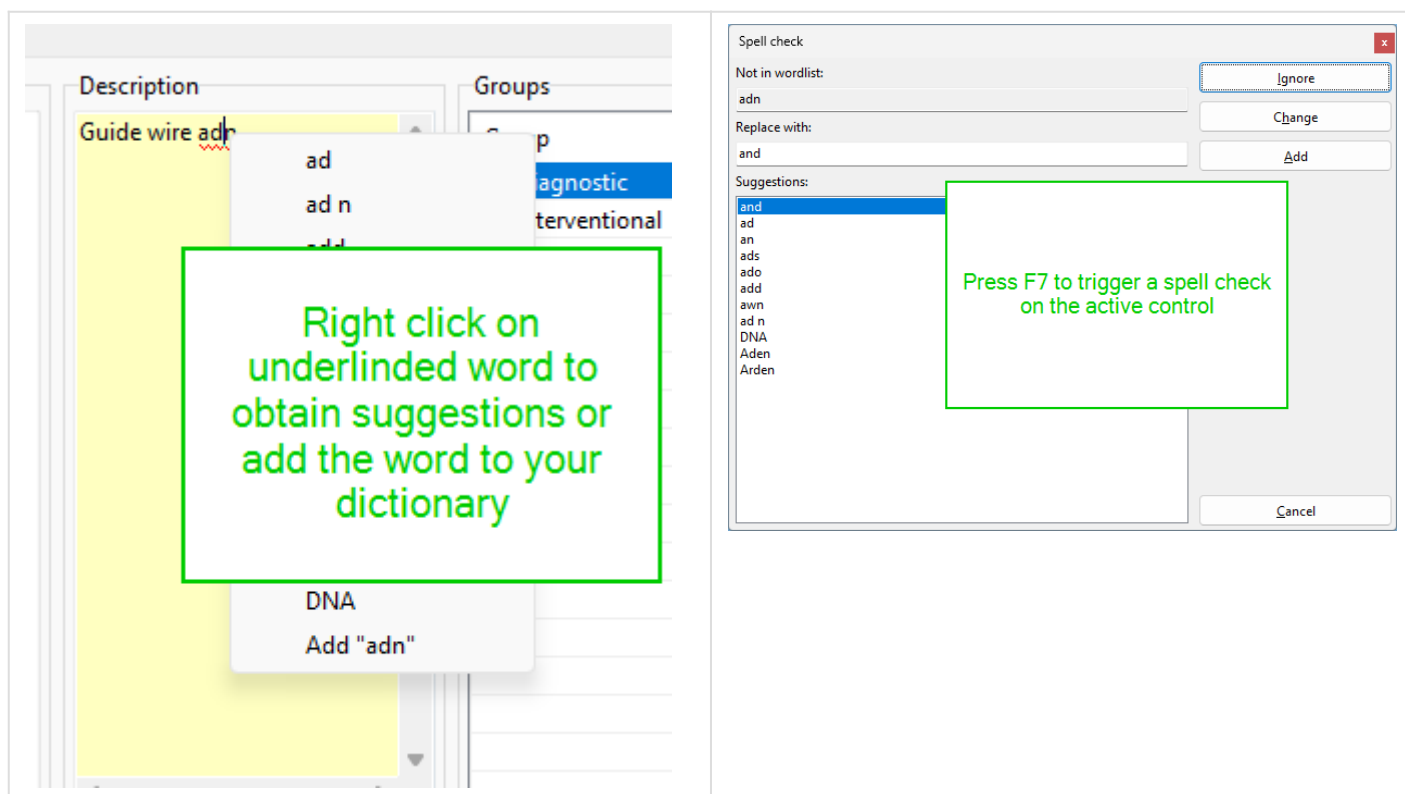

Refresh data

Spell checking

Many controls will underline words that contain mistakes. Right click on the word to fix the spelling mistake or add the word to your custom dictionary. Pressing F7 will also trigger a spell check.

Grammar checking

Simple grammar checking features can be performed by pressing F6

Required fields and field alerts

A field that is required will be highlighted and an entry cannot be saved without the field containing data

Audit Log

Most modules will include an option to view the audit log of changes to entries in the database. The audit log will contain when and who made the changes and will also provide the old and new value.
